

Junior Health Screen Consent Form

It is very important for the health of your pet to get a blood work panel at least once a year beginning at the age of two years old. This allows us to screen for common physical conditions and abnormalities that can affect your pet *that cannot and/or may not be evident* on physical examination.

The following conditions are examples of **SERIOUS CONDITIONS** that your pet can be screened for by allowing the yearly wellness bloodwork being recommended:

- *Liver Disease
- *Kidney Disease
- *Diabetes
- *Anemia
- *Infection
- *Cushing's Disease
- *Long term medication usage on internal organs (steroids, allergy medications etc)
- *Weight related health conditions
- *Congenital diseases

The key to a longer healthier quality of life for your pet is early detection and/or early intervention in therapy for disease related conditions. Baseline lab values are important to use as a guideline if your pet becomes sick or for evaluating changes on later lab screens as your pet ages. Our doctors firmly believe in a good physical examination *externally as well as internally* for your pet.

The cost for the Junior Wellness health screen blood work is \$125.00

YES! I accept the blood work screen for my pet _____.
